ELECTRIFIRE™

**ENERGY & HEALTH COLLIDE
FOR CLEAN ENERGY
FELT IN MINUTES,
LASTING FOR HOURS**

WHAT IS ELECTRIFIRE?

The human race is finally coming to the understanding that we are on the hunt for electricity, or energy, morning, noon and night. The regular energy drinks loaded with unnatural amounts of sugars, carbonation, synthetic caffeine and chemicals are only borrowing energy from your future. Don't risk your health and happiness for artificial energy.

ElectriFire is an exclusive combination of safe energy and natural health. ElectriFire utilizes ForeverGreen's patent-pending technology to take natural plant concentrates and render them water-soluble, making them instantly bio-available in the body. These proprietary blends contain natural, safe, clean and organic ingredients for instant energy that lasts for hours without the crash.

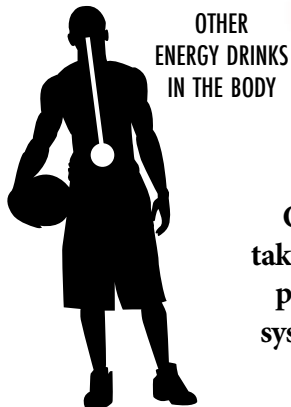

INSTANT BENEFITS FROM OUR EXCLUSIVE PROCESS

ForeverGreen uses a natural, environmentally conscious CO₂ extraction process to capture every essence from the whole plant without destroying its nutrients. This unique process preserves the essential oils, resins, and powerful antioxidant-rich phytonutrients of the whole plant.

Once the CO₂ process is complete, we use the Aqueous Molecular Partitioning (AMP) process to render the plant components water-soluble, making the nutrients instantly bioavailable in the body.

Energy and benefits of **ElectriFire** are instantly available for your body to use.

ELECTRIFIRE
IN THE BODY

OTHER ENERGY DRINKS
IN THE BODY

Other energy drinks may take an hour or longer to be processed by the digestive system before the body can receive energy.

ELECTRIFIRE INGREDIENTS:

OTHER ENERGY DRINK INGREDIENTS:

- | | |
|--------------------|--------------|
| Synthetic Caffeine | Added Sugars |
| Carbonation | Chemicals |

POTENTIAL HEALTH RISKS:

- Nervous System
- Heart Health
- Depression
- Diabetes
- Poor Sleeping Habits
- Effects of Carbonation
- Synthetic Chemicals
- Addictive Behaviors
- Premature Aging
- Other Long Term Health Challenges

“These drinks, which seldom have more than high sugar and caffeine, are being touted as the solution to our exhaustion and fatigue. Despite clear evidence that this approach has potential risks, is harmful in the long run, and may create an addiction to these products (which suits the marketers just fine,) these high energy drinks are being pushed to a gullible and unsuspecting public.

These drinks are merely “whipping a dead horse.” They only borrow energy from our future, which only postpones the inevitable crash.”

– Hugo Rodier, M.D., adjunct professor at the University of Utah.
