

Simple Daily Regime

SecreSea offers a simple regime that anyone can follow. Healthy skin doesn't have to be complicated. Being beautiful is being natural. Just as our bodies use nature's gifts to heal and flourish, our skin is most healthy when we properly feed, balance and strengthen it.

Step One: SecreSea Facial Scrub: Jojoba beans, certified organic aloe vera and gentle exfoliating granules smooth away dull surface cells and impurities for a radiant complexion. Infused with Marine Phytoplankton exclusively from Forever-Green.

Step Two: SecreSea pH Toner: This invigorating blend tones, purifies, hydrates and balances your skin's pH for a healthy blemish-free complexion.

Step Three: SecreSea Youth Serum: A botanical formula highlighted with rose essence makes this serum our highest quality offering. Rejuvenate your skin with healthy deposits of pure and/or organic nutrients, including Marine Phytoplankton.

Step Four: SecreSea Hydrating Cream: Make your moisturizing experience pleasurable with an aloe vera base and the essence of lavender. Infused with Marine Phytoplankton.

Specialty: SecreSea Mineral Mask: This deep cleansing mask gently draws out impurities and excess oil that can clog pores, leaving your skin smooth and refreshed. Infused with Marine Phytoplankton.

Q: Why is it important to use a system approach for optimal results?

A: If you use only one step in the SecreSea line, you don't know how your other non-natural products are affecting your skin. SecreSea offers a total system to give you optimal results without chemicals or synthetic agents. By using the complete system, you can be confident that your skin is not absorbing harmful ingredients through any personal care items.

Do You Know What You are Paying For?

Indulge your skin with Mother Nature's first and finest ingredients. SecreSea contains timeless offerings from sea and land, using only the highest quality botanical ingredients.

- Safe & pure with botanicals and essential oils

FOREVERGREEN
HEALTH, KINDNESS, OPPORTUNITY

Version 1.1/WW.02012008

Keep Your Family Safe by being an Educated Consumer

Your skin is the largest organ of your body. It is naturally designed to release and defend against toxins. Sadly, in the name of beauty and vanity, most of us are unknowingly immersing our skin in potentially harmful ingredients. Believe it or not, many industrial chemicals are used in personal care products. These chemicals are scientifically proven to be toxic and detrimental to our health.

Over \$36 billion dollars are spent on personal care products each year. The industry continues to grow and experts predict it to double over the next five years.

- ✧ **Less than 11% of chemicals used in personal and skin care products have been tested for safe use.**
- ✧ **One third of chemicals used in personal care products contained at least one suspected or known carcinogen.**
- ✧ **The average person uses nine personal care products daily exposing them to 126 chemicals.**
- ✧ **There are no regulations controlling the manufacturing of personal care products.**
- ✧ **The majority of personal care products on the market contain synthetic materials.**

Q: Why aren't these products regulated?

A: The cosmetic industry is such an important economical power that few are willing to get involved. Consumers must be educated and willing to protect themselves by understanding ingredients and long-term effects because no one else is doing it.

Q: What kind of chemicals should I look for?

A: Avoid products that contain parabens, benzene, isopropyl alcohol, sodium laurel sulfates, phthalates, artificial fragrances and colors, silicones, EDTA, polyethylene glycol, formaldehyde-forming compounds and propylene glycol.

Q: So how can I properly nourish my skin?

A: Not all products advertising to be natural or organic are safe. Look for products that include natural, botanical ingredients such as aloe vera, essential oils and natural antioxidants.

Don't underestimate the importance of what you eat....

What you eat directly impacts your skin and hair. In fact, proper nutrition and sleep not only enhances your appearance, but adds years to your life. FrequenSea provides nutrition on the inside, while SecreSea nourishes from the outside in.

What to Feed Your Skin

Skin cells are shed approximately every 35 days and are regularly replaced by new cells. Use this opportunity to reprogram your skin cells for health and healing instead of disease and regeneration. Skin cells need organic, pure, whole food compounds, essential oils and the finest nutrients to replicate healthy cells.

Marine Phytoplankton

For years scientists have recognized the exceptional nutritional elements embodied in Marine Phytoplankton. Micro algae have medicinal, general health and even prophylactic benefits. Marine Phytoplankton provides essential fatty acids, ionic trace minerals, vitamins, enzymes, bioflavonoids, as well as other required, essential amino acids and other phytonutrients for a total of 66 in all.

The daily use of Marine Phytoplankton, both inside and out, powerfully edifies your body's ability to heal and regenerate itself into a healthier, more vibrant you.

Combine SecreSea with the power of FrequenSea and everyone will be asking you what you're beauty secret is!

SecreSea™: Nature's Beauty Secret Since the Dawn of Mankind

After seeing the benefits that Marine Phytoplankton provides when taken internally, ForeverGreen Members began using FrequenSea externally, applying it to their skin and hair. In response to this, ForeverGreen launched a world class skin care line that utilizes Marine Phytoplankton and other key ingredients to nourish the body, inside and out.

SecreSea is designed to indulge your skin with Mother Nature's first and finest ingredients. The skin care line contains timeless offerings from sea and land, using only the highest quality botanical ingredients, extracts, and essential oils to rejuvenate and purify your skin. SecreSea generously nourishes the skin with Marine Phytoplankton and then adds aloe vera, lavender, and other nutrients to support healthy skin.

The synergy created from nourishing the body with Marine Phytoplankton inside and out promises amazing results. SecreSea is a five-step system for youthful, vibrant, healthy skin.
